

Internal Process Handbook

Anthrasync Internal Knowledge Base — Confidential

1. Expense Reimbursement Process

To claim a reimbursement, submit your expense report through the finance portal within 30 days of incurring the expense. Attach itemized receipts for every claim. Claims are approved by your reporting manager and then processed by finance. Approved reimbursements are paid with the next payroll cycle. Expenses above 25,000 require prior written approval.

2. Employee Onboarding Process

New hires complete pre-joining documentation at least three days before their start date. On day one, IT provisions accounts and equipment, and HR conducts an orientation session. Each new hire is assigned a buddy for the first 30 days and completes mandatory security and compliance training within the first week.

3. Procurement Process

Purchase requests are raised through the procurement portal and require approval based on amount: requests up to 50,000 are approved by the department head; requests above 50,000 require finance approval; requests above 500,000 require approval from the leadership team. At least two vendor quotes are required for purchases above 100,000.

4. IT Support Request Process

Raise IT issues through the helpdesk portal. Tickets are prioritized as P1 (critical, 2-hour response), P2 (high, same business day), or P3 (standard, 2 business days). For urgent P1 issues outside business hours, contact the on-call engineer via the emergency line listed on the intranet.

5. Document Approval Workflow

Official documents follow a three-step workflow: draft, review, and approval. The author creates the draft, a designated reviewer provides feedback, and the document owner gives final approval. Approved documents are versioned and stored in the central document repository.
